

Krzysztof Weltrowski

QA Engineer | Security & Identity Testing | Test Automation (Python)

Poznań, Poland (remote / hybrid) | weltrowski.krzysztof@gmail.com | linkedin.com/in/krzysztof-weltrowski | github.com/KrisWel | kriswel.github.io/My-Portfolio-site

SUMMARY

QA engineer with 4+ years of experience testing enterprise storage and identity systems at Dell Technologies and Fujitsu, now testing public-sector applications. Automated tests for authentication and hardening: LDAP with Active Directory, SSO with Microsoft Entra ID, MFA, CAC/PIV certificate-based login, STIG controls and TLS certificates, within a ~200-test Python suite. I turn technical documentation into test plans, traceable test cases and evidence, and I document what I test. Currently developing in application security testing (OWASP), identity and access management, and information security compliance (ISO/IEC 27001, NIS2, DORA).

EXPERIENCE

Software Tester | Agro Aplikacje

Oct 2026 - present

Public-sector systems for the Agency for Restructuring and Modernisation of Agriculture (ARiMR)

- Security testing of web applications based on OWASP guidelines, using OWASP ZAP.
- Functional, non-functional, regression, integration and security testing; test scenarios and cases derived from requirements.
- Test and quality documentation; defect reporting and verification in Jira; REST API testing (Postman, SoapUI) and SQL data checks.
- Support for business users during user acceptance testing.

QA Automation Engineer | Dell Technologies

Nov 2023 - Oct 2026

Dell PowerStore enterprise storage

Security & identity testing

- Automated tests of authentication and access: LDAP with Active Directory, SSO with Microsoft Entra ID (Azure AD), MFA with tokens, CAC/PIV certificate-based authentication.
- Automated verification of STIG hardening controls, mainly session timeouts and password policies.
- Verified and generated certificates for TLS-secured communication.
- Automated checks of log and alert forwarding: rsyslog, SMTP, SNMP.

Automation & tooling

- Built and maintained a ~200-test Python / Pytest / Playwright automation suite covering authentication, security, storage, REST API and Linux command-line scenarios.
- Reduced regression execution time by 42% through parallel execution, test selection and configuration optimization.
- Configured Jenkins jobs; reviewed the code of every automated test merged into the team repository.
- Built an AI-assisted testing workflow with Devin integrated with Jira, Confluence, Jenkins and GitHub, which by the end of my tenure ran most of the team's testing process; used Windsurf in PyCharm to generate automated tests.

Test design, documentation & team

- Wrote test plans from developer documentation and test cases from test plans in qTest; covered new features and service packages.
- Deployed and validated PowerStore configurations and service packages (WinSCP, Linux); analysed system logs.
- Authored customer Knowledge Base articles and How-To guides on Confluence.
- Onboarded and trained four new testers: access provisioning, product knowledge and hands-on work with the existing automation.

Junior QA Engineer | Fujitsu

May 2022 - Nov 2023

Fujitsu ETERNUS enterprise storage (SAN / NAS); promoted during tenure

- Executed test cases from Xray and reported defects in Jira.
- Configured Windows Servers and server-host-NAS connections over SMB and NFS.
- Analysed Linux logs, including core dumps, to find root causes of failures.
- Designed tests in Zephyr: split large tests into smaller critical-path scenarios with varied test data, including boundary values; increased test coverage by 30% through gap analysis.
- High-availability (HA) testing; racked and cabled a full 10-node cluster with switches.

SKILLS

Security & identity: Security testing, OWASP, OWASP ZAP, LDAP / Active Directory, SSO (Microsoft Entra ID), MFA, CAC/PIV, PKI / TLS certificates, STIG hardening

Automation: Python, Pytest, Playwright, REST API testing, Postman, SoapUI, Swagger, Bash, SQL

CI/CD & platforms: Jenkins, GitHub Actions, Git, Docker, Allure, Linux, Windows Server, Azure, VMware

Testing practice: Test planning, test design (critical paths, boundary values), functional, regression, integration, HA and UAT testing, log analysis, technical documentation

Tools: Jira, Xray, Zephyr, qTest, Confluence, Microsoft 365; AI-assisted testing with Devin and Windsurf

EDUCATION

Computer Science, engineering studies | Poznań University of Technology

2019 - 2023

Studied through the 7th semester; degree not completed yet, planning to finish it part-time.

IT Technician Programme | Technical Secondary School of Electronics, Bydgoszcz

2015 - 2019

PC hardware, Windows and Linux, networking, Windows Server / Active Directory, basic web development.

LANGUAGES

Polish: native | English: professional working proficiency
