

Krzysztof Weltrowski

QA Automation Engineer

Poznań, Poland | weltrowski.krzysztof@gmail.com | linkedin.com/in/krzysztof-weltrowski | github.com/KrisWel

SUMMARY

QA Automation Engineer with three years of experience testing enterprise storage and identity systems. Built and maintained a ~200-test Python/Pytest/Playwright automation suite for Dell PowerStore, covering authentication, security, API, and system-level validation. Comfortable across manual test design, automation, CI/CD ownership, and communicating quality risk to technical and non-technical stakeholders.

EXPERIENCE

QA Automation Engineer — Dell Technologies Poland

Nov 2023 – Sep 2025

- Built and maintained a ~200-test Python/Pytest/Playwright automation suite for Dell PowerStore, covering authentication, security, storage, API, and system-behavior validation across bi-weekly, monthly, and full-regression cycles.
- Reduced regression execution time by 42% through parallel execution, test selection, and configuration optimization.
- Owned identity and authentication testing: LDAP via Active Directory on Windows Server, SSO via Azure AD app configuration, MFA, and STIG compliance validation.
- Tested REST APIs against the PowerStore API contract using SwaggerUI and Postman.
- Owned and maintained the Jenkins jobs running the suite; used Git and Docker; reviewed Allure reports and technical logs to inform release-readiness decisions.
- Performed log analysis across DC, SRS, rsyslog, SMTP, and CACPIV subsystems for defect triage.
- Wrote scripts and fix packages for PowerStore, including automated machine-health checks; managed test cases in qTest.
- Adopted AI-assisted engineering tools — Windsurf for generating automated tests, Devin for bridging Jenkins, GitHub, Jira, and Confluence.
- Authored technical documentation, onboarding materials, and coding standards for the QA team.

Junior QA Engineer — Fujitsu Poland

May 2022 – Nov 2023

- Performed manual and automated validation of enterprise NAS/storage systems, including frontend testing and host-to-Eternus configuration (NFS and SMB shares).
- Designed and maintained functional, integration, regression, and system test cases in Zephyr/Xray, improving coverage by 30% through gap analysis.
- Split several large, unwieldy test suites into smaller, more maintainable ones.
- Owned the full defect lifecycle in Jira, coordinating with development, support, and product-owner teams.
- Used REST API tools, logs, and technical documentation for evidence collection and root-cause analysis.
- Prepared quality reports, risk assessments, and release feedback for technical and non-technical stakeholders.

SKILLS

Automation: Python, Pytest, Playwright, Selenium, REST API Testing, Postman, SwaggerUI

Testing Practices: Functional, Integration, System, Regression, End-to-End, Exploratory, Defect Analysis, Test Case Design, Log Analysis

CI/CD & Tooling: Jenkins, GitHub Actions, Git, Docker, Kubernetes, AWS, Allure

Platforms: Linux, Windows Server, SQL, Bash, Azure (SSO / App Config), VMware, Enterprise Storage & Distributed Systems, Active Directory / LDAP

QA Tooling: Jira, Xray, Zephyr, qTest, Confluence

Security / Identity: LDAP, SSO, MFA, STIG

AI-Assisted Engineering: Windsurf, Devin

EDUCATION

Computer Science (Engineering track) — Poznań University of Technology
Coursework completed; thesis in progress.

2019 – 2023

IT Specialization — Technical Secondary School of Electronics, Bydgoszcz
PC hardware, Windows & Linux, networking and network tools, Windows Server / Active Directory, basic web development (HTML, CSS).

2015 – 2019

LANGUAGES

Polish — Native | English — Professional working proficiency
